Public Health and Medical Situation Report

California Department of Public Health and Emergency Medical Services Authority

On 10/09/17, Governor Brown issued an emergency proclamation for Butte, Lake, Mendocino, Nevada, Napa, Orange, Sonoma, Yuba and Solano counties after wildfires damaged infrastructure, threatened homes and spurred evacuations. On 10/10/17, The State of California received a Major Disaster Declaration from President Trump and on 10/13/17, Individual Assistance was authorized for individuals and families in Napa and Sonoma Counties who have suffered losses due to the fires; on 10/14/17, the same assistance was approved for Butte, Lake, Mendocino and Yuba Counties. As consequences of the wildfires, Eric D. Hargan, Acting Secretary of the U.S. Department of Health and Human Services, has determined that a public health emergency exists and has existed since 10/08/17. The California Governor's Office of Emergency Services (Cal OES) State Operations Center (SOC) and the Medical and Health Coordination Center (MHCC) remain activated in response to the statewide wildfires. Multiple healthcare and developmental facilities remain evacuated across the state and the California Department of Public Health (CDPH) Licensing and Certification Program (L&C) is monitoring and updating the Facility Status Report (FSR). CDPH L&C has been coordinating with Office of Statewide Health Planning and Development (OSHPD) on reopening of evacuated hospitals and health facilities.

WEATHER SYNOPSIS BY REGION

NORTHERN CALIFORNIA

Dry and warm weather with high temperatures ranging from the mid 60s to low 80s. Variable winds 5 to 15 mph.

A major change in weather pattern will occur late this week. Before that happens, however, a weak, dry weather system will be passing through the region today followed by higher pressure Tuesday again, then a major trough will begin changing the weather pattern Wednesday with a rather cold, wet trough arriving late Thursday and Friday. Cool, moist conditions will linger through the weekend as well and another, weaker, wet system may pass through early next week. Snow levels will lower to around 4,500 feet in the north and around 5,500 feet in the south Friday and be a little lower Saturday. Afternoon highs will still be around 10 degrees above normal today (near 80) in the warmest inland locations, but drop to around Normal (near 70) Wednesday into Thursday, then become another 10-15 degrees cooler for the weekend. Winds will turn southerly Wednesday, but won't really increase quite a bit until later Thursday and Friday. Precipitation totals through the weekend will vary quite a bit, but at least a quarter of an inch of rain seems reasonable in most of the drier locations to several inches in the wetter mountain locations.

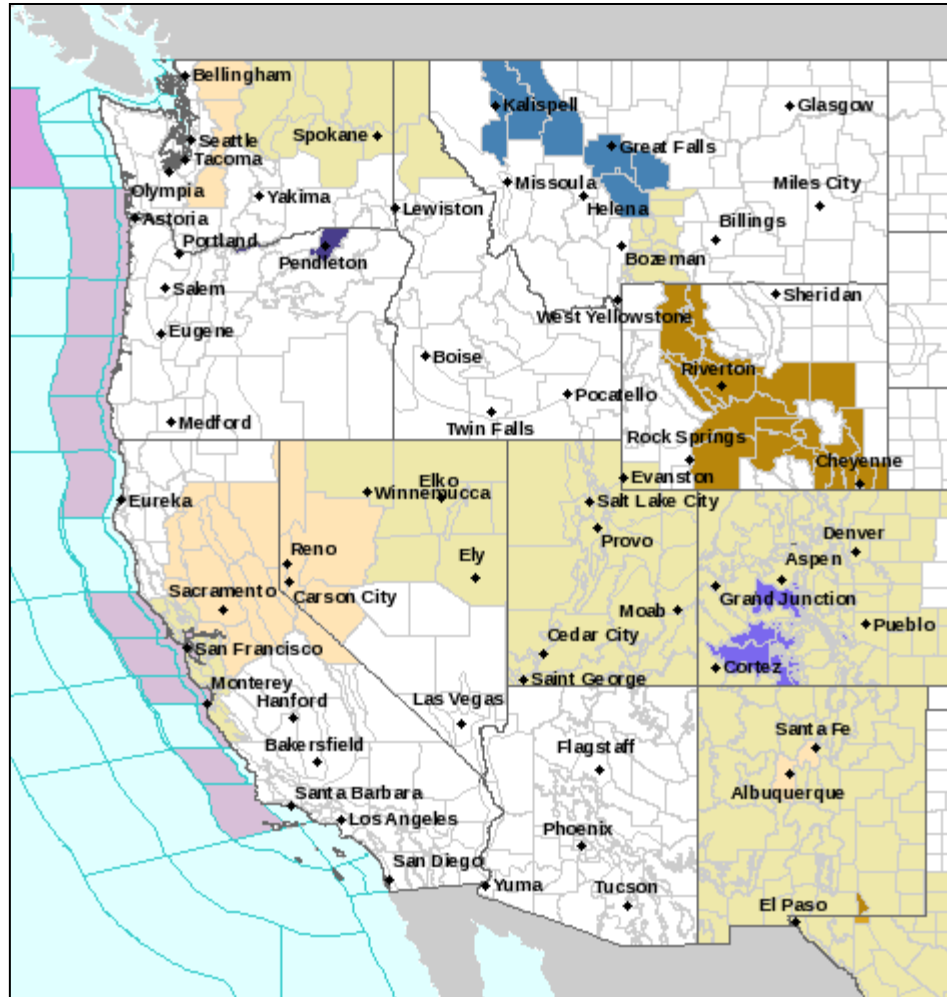

SOUTHERN CALIFORNIA

Dry and warm weather with high temperatures ranging from the mid 60s to mid 80s. Winds 10 to 20 with gusts to 25 mph for mountain and desert locations.

An area of low pressure will move across the region today which will be followed by a trough on Tuesday. This will result in a cool and moist weather pattern for the next few days as the marine layer deepens and becomes more prevalent throughout the coastal regions. Night and morning low clouds will push into the coastal slopes during the next few days with only partial afternoon clearing. With the marine layer, there will be local drizzle this morning and scattered light showers Tuesday morning, especially near the coastal slopes. Daytime highs during the next couple of days will be in the 60s to low 70s over most of the inland areas, except up to the mid-70s in and around the San Joaquin Valley. Highs today and Tuesday will be some of the coolest weather the region has had since May. West to southwest winds will increase across the desert areas with the strongest winds over the Antelope Valley, the Banning Pass, and on the desert slopes of the Cleveland National Forest where speeds will generally be 12 to 25 mph this afternoon and evening with lighter winds expected Tuesday. Elsewhere winds will generally be southwest to west 10-15 mph. Temperatures will increase by a few degrees on Thursday before a more significant trough moves into the state Friday through the weekend. This next system will bring wetting rain to much of the central portions of the state by Saturday. Some precipitation will be possible south of Point Conception by Sunday but there is much uncertainty about timing and amounts. Rainfall totals across Central California are expected to be at least ½ inch or more with snow in the Sierra above 7,000 feet. Temperatures will remain near to slightly below normal through the extended period.
